

" THE HOUSE OF THE INTERPRETER"

The Social Studies class didn't teach me
-ts your Honor

We was shooting dice at third period

WE WAS in the bathrooms getting nice smoking
blunts at third period

My principal was a drug dealer

My teachers was drug feelers

My projects was an institution thaatt prep me for
THE Metal fence institution

We went to jail to have family reunions

This is deeper then confusion

No computers, No cellphones

The history class didn't teach me the truth about
myself I'm actually more valuable then what you
considered to be wealth

The system treated melike agun used meand placed
back on the shelf the science class didn't teach
me about health

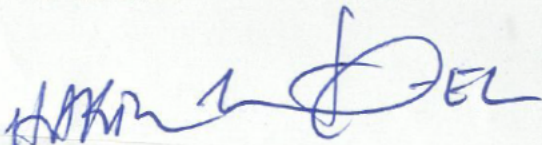

I'm dominant

We need COOPERATIVE ECONOMICS to reach our
Accomplishments

"Letter To The Editor"

My name is Hakim Trent-El I'm a prisoner who's incarcerated within the V.a. D.o.C. I've spent approximately 75% of my life incarcerated within The Virginia Department of Corrections and the Federal System .The topic or question that was brought to me is not only personal in a sense ; it's also a topic or question that can bring awareness and give the masses the opportunity to think of options to bring forth a positive change within the entire world.

How would I spend \$11 billion to shut down Rikers ,instead of on building new jails ? The first thing I would focus my spending on would be the poverty within the communities.This means providing job training and job opportunities within New York for those who live in poverty.I would create programs that would give the masses the chance to learn how to cultivate the land and grow natural resources . I would create community gardens so that people can grow their own food in harmony and this would bring a give & receive system to the masses.I would create food banks , & Homeless shelters for those living in poverty. I believe that if money could be spent on trapping or enslaving the masses then money could be resurrected to give shelter ; Food ,Clothing & Shelter for the masses.

The next agenda I would focus on would be Education ; and when I say Education I mean Benifical Education . This form of education is a resource that will help the masses overcome the obstacles , Trials & Tribulations etc.. that is in front of them . In other words this Education is survival , a means that justifies the end.

I would spend money towards medical resources . When I say this I'm relating to building more hospitals, clinics, traveling clinics, Health educational resources and benifits, alternative medicine or natural medicine. I would spend money or contribute to the discovery of cures to illness or disease.

Ultimately I would spend money on the proper programs that would aim towards prevention of negative action. Programs that cut to the core of the problem . To me the problem revolves around improper communication,

...; mental health issues etc.. We as a community must address these things head on so that the absence of Prisons and jails can be look upon as a option that will bring success .

The obvious is that the Prison Industrial Complex is "Big Business" for Capitalism and this generation is only the future of Chattel Slavery or Perpetual Slavery. A country that thrives off the Blood, Sweat & Tears of the masses. The judicial system means of justice is not prescribed for those of poverty, the minority, so-called colored etc.. The judicial system means of justice is keep the rich getting more richer and the poor more poorer by Keeping them at the bottom as workers within the Prison Industrial Complex . This is Modern day Slavery . We must look into the minds of the slaves ; today you will see that the slavery was never abolished . The Slave Today knows that the Emancipation Proclamation was only a means to legalize what the Prisons & Jails are today. There's no correction within in a system that aims to destroy the spirit and the soul. A system that places the masses in slavery and calls this correction is a corrupt , Hypercritical system that has place it's noose around the kneck of salvation. How shall integrity face oppression ?

The \$11 billion inside the hands of the pious; with the ambition to refine the community will be the best approach. I vision community centers being built; where children can go and learn & play. Where people can actively communicate and learn to love instead of Hate .

Conclusion Summary

6/17/19

After several hours , even days striving to evaluate & calculate the amount of \$11 Billion and how I would spend this amount of \$11 Billion on alternatives other than New Jails in NYC or even across the world. I came to the conclusion that I wouldn't have enough money to correct the errors or provide the solution to the evil ,cruel & savage actions that has taken place. The reason why I wouldn't have enough money is because the world needs something that money can't buy and that's Love, Truth,Peace,Freedom & Justice. These five principles in it's purest form is absoluteness & greatness. Money can't provide this. So to be absolutely honest I wouldn't need \$11 billion to accomplish my goal of uplifting humanity.

The leaders of The Prison Industrial Complex provides a misguided agenda that's manifested to the masses . The masses are led to believe that the Prisons are built to serve as correctional tools and the reality is the only correction that the Prisons provide is the fact that it corrects the addition of money added the capitailist system. So now I ask what is the cost of Love & Peace?

"Let's Get Free!!!"
